

Declaration of conformity ,Regulations on Packaging and Packaging waste (PPWR) EU 2025/40 across the European Union.

To Whom it my concern , Based on the information currently available to JORDAN CHALK MANUFACTURING COMPANY , we have no reason to believe that the combined level of cadmium, mercury, lead and chromium (VI) in our products exceeds the 100 mg/kg limit set out in Article 5(4) of the PPWR.

Also ,based on the information provided by our suppliers , heavy metals are either not present in our raw materials or the sum is below 100 mg/kg (ppm).

Some of our suppliers have provided us with the information that for their products heavy metals are below PPWR thresholds .

Othe suppliers have provided us that heavy metals are not intentionally added or used during their manufacturing processes .

Also Analysis conducted on representative materials indicates that the sum of heavy metals are below 100 mg/kg (ppm) or not detectable.

We , JORDAN CHALK MANUFACTURING COMPANY do not intentionally add any of the heavy metals as an ingredient, nor do we utilize them as processing aids during the manufacturing process of JORDAN CHALK MANUFACTURING COMPANY Products.
